HTML
CSS
Javascript
Node.js
Bootstrap
MongoDB
React

User Interface developer capable of streamlining the design and development process with background, knowledge and experience in User Interface, User Experience design, with developer's skill set, including React

Recent Development Projects | CareerFoundry

- Created a Rest API and Database project. Responsibilities included creating schemas and models, request routing, working with MongoDB for database setup and implementing authorization and authentication. Code for project can be seen here; github.com/ArtinCF93/movie_flix_api

- Created a client side application using React. Developed the interface that would be used when making requests to, and receiving responses from, the server-side database and API from the project mentioned above. Code for project can be seen here; github.com/ArtinCF93/myFlix_client_app

Work Experience

Jr. UI UX Designer | Genpact | 10/2018 - Present

- Work with Facebook as company client.

- Create test cases to improve the layout and user experience of the company internal review tool for compliance assessment of certain licenses.

- Improve review tool layout through redesign process involving wireframing and prototyping with figma.

- Increase of weekly Consistency and Accuracy results by 40% through a redesign of the review tool questionnaire. In return, team members are able to better pinpoint issues for feedback to a developer more consistently.

Compliance Review | Collabera | 8/2017 - 10/2018

- Maintained social media compliance, policies and rules of engagement standards.

- Maintained reports of team consistency and accuracy based on quality assurance tracking system.

- Provided training to team members. Updated our instructions and curriculum based on our reports, weekly accuracy, consistency results and logged scenarios.

Graphic Designer | CDCN Marketing Group | 12/2016 - 8/2017

- Developed storyboard concepts, later translating approved designs into static and animated ads using Adobe Illustrator and Adobe Animate.

- Created monthly community newsletter using Adobe Illustrator and Photoshop.

- Designed branding assets such as logos, license plates, flyers, ads and posters for clients, including Fitness19, Right Stuff, Bay Area's Finest, and Jack Link's Jerky.
